

Marine & Industrial Nozzle

Style #372-BC

- Corrosion resistant brass construction. Ideal for marine, offshore, industrial or other corrosive environment
- US Coast Guard Approval Number: 162.027/17/0
- Tough durable design, simple and easy to operate
- Quality stream and excellent reach at variety of pressures
- Multi pattern detents for positive positioning of pattern
- The nozzles are easily customized to meet with your specific requirement
- Low through life maintenance due to the use of tip quality material and design
- Conforms to all aspects of NFPA 1964, 2003

Style	Inlet	Flow		Length	Weight
		GPM	LPM		
372-BC	1-1/2" or 2-1/2"	95 @75 psi	360@3.5 bar	8"	7.7 lbs
		125 @75 psi	475@5.2 bar		
		60 @100 psi	230@7 bar		
		95 @100 psi	360@7 bar		
		125@100 psi	475@7 bar		

UNIQUE FEATURES ON PROTEK INDUSTRIAL NOZZLES

1. 316 stainless steel teeth ensure corrosion resistance and durability
2. US Coast Guard approved for shipboard operation
3. FM approval
4. Can be filed retrofitted to optional flows and pressure
5. Marine brass construction for harsh environment
6. New improved handle with two reinforced metal pieces on each size to ensure the breakage free
7. Stainless steel inlet screen catches solid before they enter nozzle
8. Heavy duty chrome plated shutoff balls ensures a smooth action and long dependable service life
9. Flow pattern détentes gives positive positioning
